OLAE SRA Concluding Remarks

Thierry Van der Pyl
Director, INFSO-G

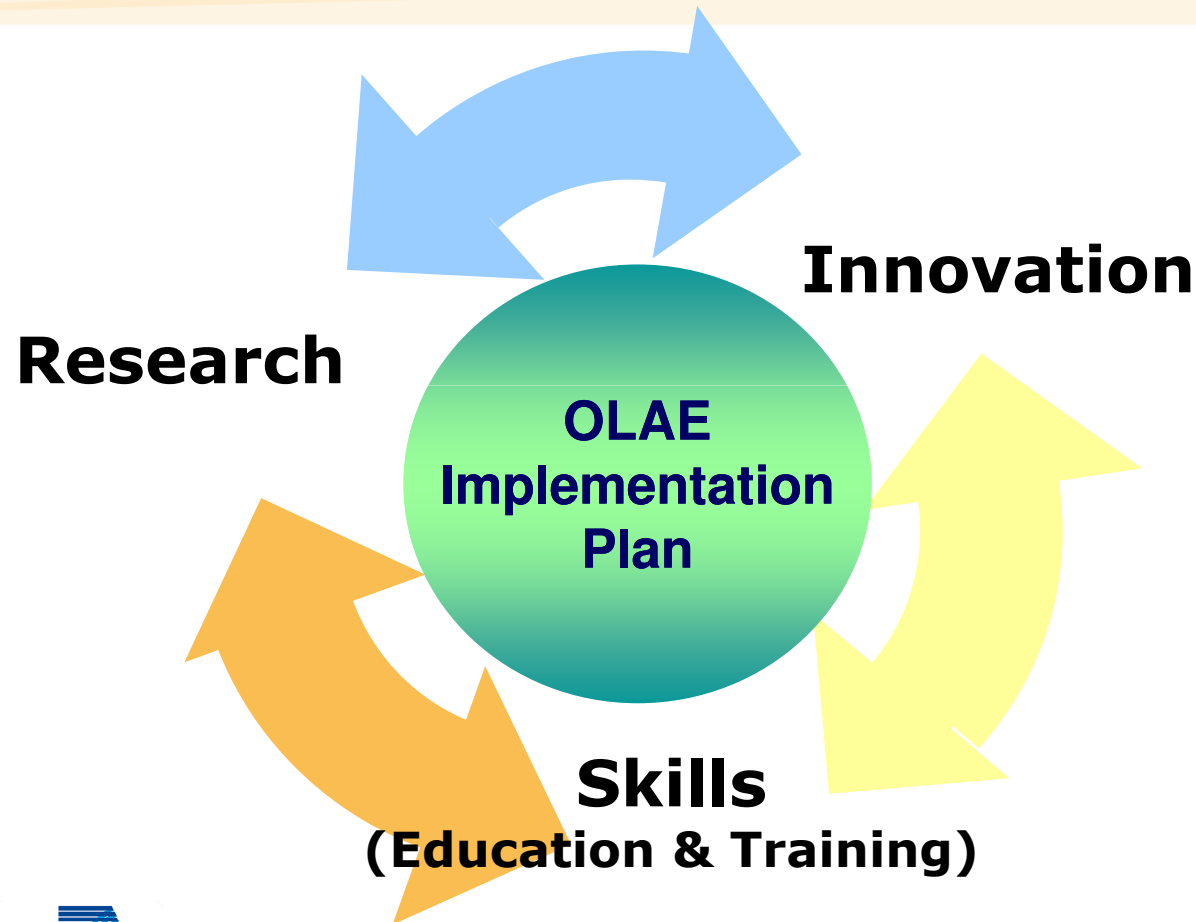

Review of the SRA presentation meeting

Thank you for this timely and excellent work!

- Draft SRA shows good balance and coverage; clear R&D challenges and synergies
- Builds well on existing efforts
- Emphasis both on longer-term R&D and application-driven research
- Addresses the whole value chain (materials – processing – components)

OLAE and the “Knowledge Triangle”

- Infrastructures
- Clusters
- Lead markets; venture capital
- Intl. Cooperation
- ERA-NET+
- Standards
- ...

Next steps

- Consider SRA based on
 - the feedback of today
 - consultation with Member States
 - wider consultation with Industry (online)
- Stocktaking exercise: mapping ongoing projects with respect to the SRA
- Present final SRA (at Photonics21 meeting 14-15 January 2010)

On the way to SRA implementation
